## **SINGLE FEASIBLE SOURCE POSTING**

**The Missouri Department of Transportation has determined there is only one feasible source which can provide the described products or services to the Northeast District.**

**Title:** Trafficon Video Detection Procurement File # NE12-43S-R2

**Description:** Control Technologies is responsible for the distribution of Traficon Video Detection Equipment for the State of Missouri. MoDOT has Traficon Video Detection Equipment installed at various signal locations in the Northeast District. From a technology and training viewpoint, the differences between Traficon and Autoscope, the other approved brand of detection equipment, are distinct enough to raise compatibility issues if both types of equipment were to be used. Also, it would not be feasible to have to maintain two sets of spare parts for emergency repairs on different systems. MoDOT will use this supplier as needed during the contract period for various projects. The vendor will submit individual pricing proposals for materials when requested. MoDOT will have the right to accept or reject any pricing proposals received.

**Contract Period:** January 2012 through January 31, 2013

**Agency:** Missouri Department of Transportation
